## C. J. BRAREN

### Quality Bread

There is a peculiar something about Barber's Bread that makes it stand out prominently in many homes in this town—it has a tastiness that causes the children and grown ups to marvel at its goodness. The answer is, Quality, and that is because the best wheats and other ingredients of the highest nutrition, combined with modern methods of baking go into every loaf. We serve quite a number of the citizens daily, and we can serve you too. Buy a loaf of our bread today and you will appreciate this. Our cakes and pastries are equally good, and prices are reasonable.

### MARY PICKFORD

in "Daddy Longlegs"

### CLARESHOLM LOCAL NEWS

Mary Pickford in "Daddy Longlegs," Rex Theater, Friday and Saturday, July 16 and 17.

Rev. F. W. Locke left Thursday morning for Gull Lake where he will spend a part of his holidays.

Miss Eva Moffatt has left the Agricultural college and taken a position with the Canadian Bank of Commerce.

You need the Chautauque. It will cheer you up and get your mind on other things than crops. It will cure the blues.

Mrs. Tupper, mother of Dr. Tupper, is spending a few weeks with her son. A sister also of Dr. Tupper, Mrs. Hazen of Saskatoon, is visiting with her brother.

Born, to Mrs. Josephine Shade of Long Beach, California, on June 28th, a daughter, Mrs. Shade is a daughter of Mr. and Mrs. P. Mosley. The answer is, Quality, and that is because the best wheats and other ingredients of the highest nutrition, combined with modern methods of baking go into every loaf. We serve quite a number of the citizens daily, and we can serve you too. Buy a loaf of our bread today and you will appreciate this. Our cakes and pastries are equally good, and prices are reasonable.

One of the most beautiful and talented leading women on the scene, Betty Blythe, plays an important role in "Burnt Wings" the sensational photoplay by Bayard Veiller and starring Frank Mayo, which is to be seen at the Rex Theater on Friday and Saturday July 9 and 10. Miss Blythe was recognized as one of the beauties of the American stage before becoming a motion picture player.

On Dominion Day, Capt. Fred McCall, who with his aeroplane was the main attraction at the Pincher Creek celebration, received a hurry up call with a big financial inducement to cancel his engagement there and rush to Calgary to take the place of one of Lieut. Locklear's aviators who was incapacitated, for the afternoon performance at Calgary Exhibition. When McCall stopped at Clareholm about mid-afternoon for gas he was on time, and no doubt made it, as he left here at a clip of about one hundred miles an hour.

The many friends of Rev. Fath had will be sorry to hear of his death which took place at Calgary on Thursday. Many did not know of his illness. During his stay in Clareholm he has won the respect of the entire community. Broad minded and sympathetic with those who differed with him, he has proved himself a man among men. He has frequently spoken in the Methodist and Presbyterian churches and it became evident to all that the narrow sectarian outlook had no place in his mind. He was an excellent pastor and endeared himself to his congregation as no former pastor has done. The sympathy of the entire community goes out to the bereaved wife in her time of sorrow.

### LAKE WINDERMERE CAMP

There will be opened to tourists this summer a new resort of rustic design in the Canadian Pacific Rockies on the sandy beaches of Lake Windermere, the loveliest warm water mountain lake in British Columbia. Lake Windermere is situated about 170 miles south of the main line of the Canadian Pacific and is reached from the main line at Golden, the station being Lake Windermere.

The scenery of this region, combining, as it does, pastoral beauty with rugged grandeur, will attract visitors from all parts, and will become a favorite playground.

The summer visitor will find here everything that he could wish, bathing, boating, riding on mountain ponies to great canyons and glaciers, golf, automobile, fishing, and big game hunting in season.

The Canadian Pacific are erecting a number of cabins fully equipped with every convenience of the modern home, which will be opened July 1. Community hall for dancing and social recreation.

An auto road from Banff is in course of construction by the Dominion Parks Board. Ask the Agent of the Canadian Pacific for booklet and full particulars.

W. L. MELLINGER, lecturing on "Misunderstood Mexico," at the coming Chautauque.

### NOTICE

Notice is hereby given that in accordance with the provisions of The Irrigation Act, the undersigned has filed the necessary memorial and plans required by Sections 13 and 15 of the said Act, with the Commissioner of Irrigation at Calgary, Alberta.

The applicant applies for the right to divert one hundred and fifty-eight acre-feet of water per annum from Willow Creek at a point on the road allowance north of the northeast quarter of Section 32 and the northwest quarter of Section 28, Township 11, Range 27, west of the 4th Meridian, for irrigation purposes, and for the right to construct the necessary works, as shown by the memorial and plans filed, to enable the water so diverted to be used for the said irrigation purposes on the said northwest quarter of Section 28 and the northeast quarter of Section 32, Township 11, Range 27, west of the 4th Meridian.

Dated at Clareholm, Alberta, this 7th day of May, 1920.  
P. J. Petersen, Applicant.

### Vanderhoof Has A Future

Bright Prospects Ahead of the Nechako Valley District

A thriving British Columbia town that has a very bright future before it is Vanderhoof. Situated in the Nechako Valley on the Grand Trunk Pacific railway, midway between Edmonton and Prince Rupert, it is the centre of a fine agricultural district, eminently suitable for mixed farming. The soil in the Vanderhoof district is almost inexhaustible and is easy to clear. The land in the Nechako Valley produces wonderful crops of grain and timothy hay, as well as fine vegetables. Settlers are fast filling up the country, and the Soldiers' Settlement Board has placed a number of returned men on the land. The government is establishing a creamery at Vanderhoof, and undoubtedly it will become the centre of a great dairy district. Much of the land is suitable for stock raising, and the timbered area furnishes good shelter for stock. Sheep raising and mixed farming generally will prove very profitable. There is fine fishing and good hunting close at hand, mineral wealth in the district, and a pleasant and mild climate.

### New Building Material

Experiments are being carried on in building houses from marble dust and sawdust at Vancouver. It has been claimed that the cost of the house in construction will be six cents a foot in place of 60 cents a foot for ordinary building materials. The new material is claimed to be durable and take a high polish.

In Japan practically no women ever fast using the many different types of shoes.

## Pains About the Heart

ANY derangement of the heart's action is alarming. Frequently pains about the heart are caused by the formation of gas arising from indigestion.

Relief from this condition is obtained by the use of Dr. Chase's Kidney-Liver Pills.

Chronic indigestion results from sluggish liver action, constipation of the bowels and inactive kidneys.

Because Dr. Chase's Kidney-Liver Pills arouse those organs they thoroughly cure indigestion and remove the many annoying symptoms.

## Boheivists Lowest Types of Humanity

First Hand Information Acquired In Intelligence Department

"If once the Russian people were freed and allowed to vote the Bolshevik regime would vanish like smoke, but they are kept down by machine guns and massacres," declared O. D. Stevenson, B.A., of Toronto, a former Stafford boy, at a chamber of commerce luncheon. Mr. Stevenson told of the Red movement from first-hand experience, while in the British intelligence department.

The Bolsheviks he termed the lowest type of humanity who are living by blood and fire with German money and organization to a large extent, but not entirely, behind the movement.

After quoting a literal translation of a proclamation taken from the walls in many towns of Russia, of "Nationalizing Women," Mr. Stevenson said that tens of thousands of decent women committed suicide. Those who refused to be nationalized were tortured in a most fiendish manner and then ravished until they died, after which their bodies were quashed and hung up to frighten others.

With a threat of torture recruits for the Bolshevik ranks were secured. In one city no larger than Toronto, said Mr. Stevenson, "over 150,000 persons were massacred in three or four months. One of the main streets had, when we entered, between 5,000 and 10,000 dead bodies hung on poles, posts, trees, etc., the men with their eyes pulled out, with imitation caputels nailed to their shoulders and horseshoes nailed to their feet. One man was crucified by his hands being acting in the way these fiends in human form acted. A dead set was made against religion, and many of the priests were crucified at their altars."

## Lift off Corns!

Doesn't hurt a bit and Preezone costs only a few cents.

With your fingers! You can lift off any hard corn, soft corn, or corn in place of 60 cents a foot for ordinary building materials. The new material is claimed to be durable and take a high polish.

## Shipping Grain to U.S.

Large Shipments of Alberta Wheat And Oats Go To The United States

Wheat valued at more than one million dollars has been shipped from the province of Alberta to the United States and chiefly to the state of Montana from January 1 to April 20, 1920, states S. C. Reat, United States consul at Calgary, Alberta. During the same period more than one million bushels of oats were shipped across the line.

Most of the wheat was shipped across during January and February and the highest price paid was \$3.25 a bushel, while the average was \$3.05. Oats averaged 60 cents a bushel and one shipment of \$105 was paid. The large shipments of wheat during the first part of the year were caused by the lifting of the embargo on wheat to the United States on December 15. The demand for oats, especially in Montana, created a good price, that, together with the exchange rate, were big factors in increased shipments of oats.

During the first four months of the year, a total of 374,480 bushels of wheat, valued at \$1,157,562.82, were shipped into the United States from Alberta, as compared with 30,985 bushels valued at \$95,040 in the last quarter of 1919. The fact that the embargo was not lifted until December 15 must be taken into consideration in comparing the two periods. A total of 1,131,000 bushels of oats valued at \$674,319.53 were shipped out during the first quarter of this year, as compared with 77,000 bushels, valued at \$23,210.99 for the first four months of 1919.

## SNUFFS OUT A COLD IN A FEW MOMENTS

Clears The Nostrils, Stops Sneezing Heals The Throat Quickly

### Catarhoozone Wonders

Lots of people used to let their colds "run off"—they waited until a whole lot, sneezed around the house, till the whole family finally caught the infection. Nowadays colds are cured by Catarhoozone. This healing vapor, full of pure essences, gives instant relief. It fills the breathing organs with a healing, soothing vapor that relieves irritation at once. Ordinary colds are cured in ten minutes. Absolutely sure for catarrh, and in about half the time it works like a charm. Catarhoozone is a permanent cure for bronchitis and throat trouble. Not an experiment—but a cure that's guaranteed. Get "Catarhoozone" today, and beware of substitutes. The dollar bottle is guaranteed, retail size 50c; trial size 25c, at all dealers.

### Alfalfa Cultivators

Proper Methods to Follow in Order To Ensure Success

Alfalfa may be sown with a nurse crop in parts with a good rainfall if the seedling down is done on land that is not more than one crop from having been summerfallowed. A light seeding of about a bushel of barley or a bushel and a peck of oats per acre is heavy enough seeding for a nurse crop. In the drier sections of the provinces and on land that has not been summerfallowed, recently in the wetter sections, seeding without a nurse crop will give much better results. When seeding with a nurse crop the alfalfa should be sown at the same time as the nurse crop. When seeding alfalfa alone, the land, if in summerfallow or hard crop the previous year, should be top worked until about the first of June and may be sown in late May or early June. In fall plowed and top worked in the spring until June and then seeded. Fifty pounds per acre is the usual rate of seeding.

Northern grown alfalfa seed of the Grimm, Turkistan or Baltic varieties must be used, Grimm being better than either of the other two. Before sowing the land or the seed must be inoculated with alfalfa nitro culture unless the land has grown alfalfa or sweet clover previously. Of the two methods, inoculation of the seed is usually easier, and gives good results. If these two precautions are taken the first steps necessary to success are assured—N. D. McKenzie, Seed Indian Head Experimental Farm.

### Americans Interested In Western Lands

New York Financial Houses Investigate Lethbridge Irrigation

Investigation of the Lethbridge Northern Irrigation Project by two New York financial houses of high standing, will undoubtedly result in immediate future with a view to purchasing the bonds of the irrigation district, it was asserted by L. M. Roberts, a leading barrister, on his return to Calgary from New York. Mr. Roberts, who some time ago obtained an open option for the purchase of the bonds, went to New York in this connection. He anticipates that the inquiry into the irrigation undertaking by engineers and by the financial houses will take place in June. The terms of his option are not such as to interfere with the right of the irrigation district to make any other arrangements for the sale of the bonds which they may desire, and in the event of a definite offer being made the district will have the right to accept or refuse.

### Prophecy Success

Gen. Sir Arthur Currie, before the war a lawyer and real estate man, won an enviable reputation as a war leader and became the commander of the Canadian Expeditionary Forces. He shows New World versatility again by accepting the post of principal of McGill University, Montreal, succeeding Sir Auckland Geddes, British Ambassador in Washington. Most fighting Canadian prophecy for his success in his new post—New World Weekly.

### Minard's Liment used by physicians

Advertising His Wares

Sh—And how is your bachelor friend? He—When I saw him last he was nursing slowly. Sh—Indeed, I didn't know he had been ill. He—He hasn't been; he was wearing some buttons on his clothes. Sh—Indeed, I didn't know he had been ill.

### Don't Danderine! PUTS BEAUTY IN HAIR

Your hair needs stimulating tonic, life, color, brightness and abundance will return—Hurry!

## Brugges to Truth

The preacher announced that next Sunday his subject would be "Lies" and that he would be very glad if during the week, they would read the 17th chapter of Romans for themselves.

"The next Sunday the preacher commenced by reminding his hearers of the request he had made, and asked all those who had read the 17th chapter of Romans to stand up. To his astonishment half the congregation stood up.

"Thank you very much," said the preacher, "now it is to you I want to speak today, because there is no 17th chapter of Romans!"

### A Losing Game

He—Life with me has been a failure.

She—You must have had and wasted some opportunity.

He—No; I have spent half my life raising whistles to conceal my youth, and the other half in dying them to conceal my age.

### NOURISHING FOOD AND GOOD HOURS

Help You To Resist Disease—Aid These With a Tonic to Keep

### The Blood Purifier

The power of your body to resist disease and to fight it after disease has been taken, depends on the most precious possessions you have. You weaken this power when you let your general health run down, your blood gets thin and your nerves unnerve.

You weaken it when you worry, when you do not get sufficient sleep, and when you are under-undressed, either because you do not eat the right kind of food, or because your digestion is out of order.

You preserve your power to resist disease when you keep good hours and eat proper food at regular intervals. You further increase and strengthen this power to resist disease when you build up your blood and nerves from the occasional use of a tonic like Dr. Williams' Pink Pills, which are free from opiates and harmful drugs of any kind.

The value of these pills, as a health builder, is fully shown by the experience of Mrs. E. C. Taylor, Hanover, Ont., who says: "At various times since I was a girl of fifteen I have proved the value of Dr. Williams' Pink Pills. At that age I was in much poor health condition, suffering from many of the well known symptoms of anaemia. My mother procured a supply of Dr. Williams' Pink Pills for me. My health improved and I was restored to normal health. Again after my marriage and before my husband and I felt miserable and again took Dr. Williams' Pink Pills, which once more met all my expectations and fully restored my health. My husband's experience with these pills was following an attack of pleurisy, which left me completely broken in health. Part of the time I was under the care of two doctors, and for three months I practically lived in bed and death. Again my mother procured a supply of Dr. Williams' Pink Pills. I had not been taking them long before I could tell that they were helping me. Day by day I could feel my strength returning and my usual enjoying good health once more. In view of my experience I think I can safely say there is nothing else of medicine better than Dr. Williams' Pink Pills. Dr. Williams' Pink Pills are sold in boxes of six boxes for \$2.50 from Dr. Williams' Medicine Co., Brockton, Ont."

### The Only Safe Place

"Why," asked a Missouri paper, "does Missouri stand at the head in raising mules?" "Because," answered another paper, "that is the only safe place to stand."

### GANDERINE PUTS BEAUTY IN HAIR

Girls! A mass of long, thick, gleamy tresses

Let "Danderine" save your hair loss and double its beauty. You can have long, thick, strong, lustrous hair. Don't let it stay lifeless, thin, scraggly or fading. Bring back its color, vigor and vitality. Get a glass bottle of delightful "Danderine" at any drug or toilet store to freshen your scalp; check dandruff and falling hair. Your hair needs stimulating tonic, life, color, brightness and abundance will return—Hurry!

## Bees Culture is Profitable in Alberta

Edmonton Apiarist Proves That Beekeeping is Profitable

Bees have proved themselves to be very adaptable to the climate of Western Canada, but very profitable to raise as a side line, and as an example of this, the experience of Mr. William Wenzel, of Edmonton, may be given. Mr. Wenzel has been keeping bees for the last six years. The returns he has obtained from them go to show that they can be reared economically, and that the honey produced is fully equal to any of the imported variety.

Mr. Wenzel started with a foundation swarm of mixed bees, and by using only well bred queens, which he imported from Tennessee, he managed, within a few years to produce a strain of bees that he had almost pure strain of Italian bees. He keeps from ten to fifteen hives, and disposes of the surplus in the spring or early in the summer.

From the standpoint of profit and proficiencies, bees can hardly be equalled by any other member of the animal or insect family producing food for human consumption. In the spring of 1918 Mr. Wenzel had nine hives, three of which were in very poor condition. During the summer the nine hives increased to 21, and honey production was the result. For winter feed, was eight hundred and twenty-seven pounds. The honey sells at from 35 to 40 cents per pound, and the record of production from the apiary was 100 lbs. per hive, or at 40 cents per pound, \$40 worth of honey per hive.

Wenzel requires very little attention in Western Canada. With a clover or alfalfa field in the neighborhood, bees are always profitable and suitable hives, they will practically look after themselves for the whole summer. In the fall the hives contain the bees are either stored in a cellar or left out in the open.

If the bees are left outside, a box large enough to cover the hive and leave a space of about four inches on all sides is put over the hive, and the space filled with chaff. An opening, however, is always provided, and it has been found that when the hive is plugged up the bees will come out when the opening is made and they die in their attempt to get out. On the other hand, when there is an opening they never go out unless on a very stormy or rainy day.

Mr. Wenzel's experience goes to show that it is better to winter the bees outside. They are not more active and start to work earlier in the spring, but seem to be in far better health. However, if the bees are kept in a cellar, or under a cover, it has been found best to take them out about April first.

Bees come out and are ready to start to work as early as the middle of the warm weather begins. The hives are then cleaned out and the frames and combs are taken out. From this time they require no attention until they start to swarm towards the end of May or the beginning of June. In view of the fact that the season is put in a hive of its own, they are a second swarm. One season ago Mr. Wenzel's swarms were hatched in June produced 90 pounds of honey the same season.

It is the practice to take out the honey and put on a super with a queen excluded to induce honey production about the end of July. In September, all except 35 or 40 pounds of honey, which is left as winter feed, is taken out and the hives prepared for winter.

### Rural Depopulation

Fathers of Our Farms Must Remember the Young Man's Needs

How shocking the facts would appear, as we read the statistics of how many young men have left the farms because their fathers drove them off. They just could not stand it any longer with their fathers. A study of this side of the question of rural depopulation would be illuminating to many a farmer who, with his mindless, bigotry, and prejudice, lack of vision, lack of appreciation, lack of sympathy and lack of praise and encouragement have done and will yet do in robbing the farms of their very best young blood.

These fathers of our farms must learn anew and remember the young man's needs—real and imagined—and his point of view; and give him long return the requisite confidence, comradeship and understanding. Otherwise there is the loss—great loss indeed—Rural Canada.

Don't worry over lost opportunities but keep your eyes open for the next one that comes along.

Dust from shoddy mills is used as a fertilizer in England.

FRIDAY, JULY 2, 1920

## Clareholm Chautauqua

The first announcement of the 1920 Chautauqua program indicates that the attractions to be presented are of the same high standard which has characterized the Dominion programs in the past. Music, lecture and entertainment hours apparently have much in store for them during the week of July 9 to 15, the Chautauqua dates for Clareholm.

A lecture event of cardinal interest is scheduled in the coming of Tom Skellyhill, the noted Anzac soldier-poet. He was acknowledged by Theodore Roosevelt as the greatest speaker the war produced and he has been winning new laurels of late with his powerful reconstruction lecture, "Rebuilding the World."

Other lecturers of prominence are: Dr. George Adam, a descendant of the famous Gladstone family and head of the Munitions Board in the Lloyd George's cabinet; Burnell Ford, prominent inventor and electrical scientist who brings a lecture-entertainment of real educational, educational value and intense interest on the marvels of electricity illustrated by seven experiments; Hon. C. H. Poole, member of the New Zealand parliament and one of the most brilliant men of the Antipodes; Capt. Norman Allen Imrie, formerly staff lecturer with the Canadian Army and now speaking on British-American relations; and M. L. Mellinger, who throws a new light on the Mexican situation.

Perhaps the outstanding feature of the entire weeks is the production of "It Pays to Advertise" on the fourth night by the Keighly New York Players. This comedy success has had sensational runs in all our cities and because of its wholesome atmosphere is an ideal Chautauqua play.

The music of the week promises much to the music lovers of this community. On the opening day, the Old Fashioned Girls come in two concerts. On the second day comes the Ward Waters Trio in two programs of music and entertainment. On the third day a musical event of real importance is scheduled in the appearance of the Zeller Symphony Quintet. This company, under the direction of Nicolai Zeller, a Canadian cellist, is rated as one of the best symphonic orchestras on the concert platform. The fifth day brings a musical event which will particularly appeal to lovers of the violin. Ferdinand Fillion, noted French violinist, appears on this day in two recitals, assisted by Gabrielle Claus, dramatic soprano, and Frances Beall pianist. The closing day witnesses the coming of the Fisk Jubilee Singers. This famous colored organization from Fisk University, Nashville, Tennessee, is rated as the greatest negro singing quintet in the country.

It seems strange that the only kickers against the Chautauqua are those who have no financial responsibility in the matter and those who did not even try it last year. Those at least might be a little grateful to the men who by their guarantee make it possible for them to hear some of the best talent on the continent for the small sum of twenty-five cents an entertainment. The Chautauqua is simply a cooperative method of getting the best entertainers at a small cost. Any one of the entertainers mentioned will be given will be equal to any dollar entertainment ever given in Clareholm. We have all paid twenty-five cents and a dollar for entertainments that we have declared after we had seen them were not worth ten cents. By this cooperative plan of securing entertainment we guarantee first class entertainments. The lecturers are men of world wide reputation. The musical entertainers have records behind them that will secure them an audience in any intelligent community. All of them can stand on their merits charging the usual dollar admission, but no entertainers can

come round at a twenty-five cent admission without a guarantee on the part of the community. Let us not overlook the fact that it is only by Chautauqua that we can possibly secure the class of entertainments that will appear in Clareholm from the 9th to the 15th of this month. The value of the Chautauqua today is so well known all over the continent that it is rather a reflection on a man's intelligence to say a word against it. We never needed the Chautauqua more than we need it this year. Take a week's holiday and attend Chautauqua and it will be the cheapest and the most valuable holiday you ever spent.

DR. GEORGE ADAM, former member of Lloyd George's Munition Board, coming to Chautauqua.

SIGNALLER TOM SKEVILL, Anzac soldier-poet, bringing a great reconstruction message during the Chautauqua.

## EXTENDING C.P.R. WORKS

In order to speed up on the construction of equipment required for the rapidly expanding traffic on the Canadian Pacific Railway, large extensions are being made at the Angus Shops in Montreal, which are already the most elaborate and comprehensive of their kind on this continent. These extensions will cover a quarter of a million square feet and are expected to cost approximately a million dollars. The largest addition will be made to the passenger car shops, amounting to 7,000 square feet, while over 35,000 square feet will be added to the locomotive shops, and 42,500 to the freight car shops. The following are the detailed particulars of the extensions:

**Locomotive Shop.** The extension to the Locomotive Shop will consist of an addition at each end of the present shop to give an additional floor area of 58,000 square feet. The construction will be steel frame concrete foundation, brick walls. Masonry floor will be placed on the west end extension and wood block floor on concrete in the east end extension. The east shop extension is to be used as a running shed, and for this reason pits with mill-type smoke jacks will be installed. All of the skylights will be constructed in wood as metal has been found to deteriorate very rapidly, and for the same reason mill-type ventilators will be used throughout this shop.

**Freight Car Shop.** Consists of an extension to the present building at the west end, 106 feet wide by 400 feet long, giving an additional floor area of 42,500 square feet. The construction will be steel frame concrete foundation, brick walls, wood floor and roof similar to present building.

**Passenger Car Shop.** Consists of an extension of 112 feet by 161 feet between shops 2 and 4, and 147 feet by 210 feet between shops 1 and 3, and 137 to 210 feet east and extension of shop three, giving a total increased area of 71,000 square feet. The construction will be concrete foundation, brick walls, mill-type concrete and mastic floors. These shops will be all served

(1) Some of the machinery in the Angus Shops.

(2) Cars for passenger service turned out at Angus Shops.

**Car Electric Shop.** This is a new building 62 feet wide by 362 feet long, giving a floor area of 22,624 square feet. The construction will be steel frame, concrete foundation, with brick walls and acid proof mastic floor.

**Flaming Mill Shelter.** A shelter 126 feet by 141 feet long will be built on the west end of the present planing mill for the purpose of keeping material under cover as a weather protection and will give an area of 17,800 square feet for this purpose.

**Iron Kiln.** Four new stoves will be added to the present west dry kiln, increasing the area by 7,000 square feet. The construction will be steel

framing with ventilating ducts in walls built in brick and concrete foundation.

**Track Scale.** A new heavy service tapered floor track scale will be installed at the west end of a capacity large enough to weigh locomotives. The construction will be of the most modern type with self-aligning beam scale shelter and concrete pit. The floor of the scale will be steel beams and stands, with a mastic scale platform.

**Trucks.** A number of track chutes and rollers will be made at both ends of the yard to provide extra car capacity. There will also be installed a 30-ton mechanical coaling plant as well as a new standpipe for the use of switch engine.

Remember, your Chautauqua Season Tickets cost less if you buy them before the opening day.

## Clareholm Local News

Mary Pickford in "Daddy Longlegs," Rex Theater, Friday and Saturday, July 16 and 17.

Mrs. John Wall was taken to Calgary hospital on Tuesday morning and is in rather serious condition.

The Calgary Exhibition was better than ever this year. Many from Clareholm and district have attended it this week.

Rain is badly needed in this district, as well as in many other parts of the west. A good soaking rain within the next few days would be the making of a good crop.

The Orangemen, under the joint auspices of High River lodge and the Calgary County and District lodges, are holding a big celebration at High River on July 12th.

When you take hail insurance you need a reliable company. Fraser & Peck have the two strongest companies doing business in Alberta. If you are short of cash your note will be accepted. You need the protection.

The Methodist Sunday school picnic was held at the creek on Dominion Day and was a day of real sport. There was a big crowd in attendance and plenty of food to feed them. The day was spent in racing, bathing and feeding and all went home feeling that they had had the best picnic ever held.

Frank Mayo, the popular Universal star, supported by Rudolph Christians, Betty Hlythe, Josephine Hill and other Universal favorites will be seen in "Burnt Wings," the screen production of Bayard Veiller's great stage success, "The Primrose Path," which comes to the Rex Theater on July 9 and 10.

Mary Pickford in "Daddy Longlegs," Rex Theater, Friday and Saturday, July 16 and 17.

### From Cfadle to Screen She Played Leads

Josephine Hill, who plays the young wife in "Burnt Wings," opposite Frank Mayo, in the film production coming to the Rex Theater on July 9 and 10, had a leading role at the age of five. Many theatergoers will recall the Pollard Lilliputian Opera Company, which charmed the public about fifteen years ago with a repertoire of musical productions given by actors ranging in age from five to twelve years.

At San Francisco Josephine Hill, whose mother was a musical comedy favorite, was one of several youngsters engaged. She was then four years old. In a few months she was promoted to leading parts. For three years she played leads in this organization, but at the age of eight "retired" and entered school.

Two years ago Josephine, her education completed, came to Los Angeles and became associated with Universal. She has played leading roles in a dozen western dramas and feature productions.

In "Burnt Wings" she is seen as an artist's model—a role which gives her ample opportunity to display her beauty as well as her dramatic ability.

### NOTICE OF IMPOUNDED ANIMAL

Notice is hereby given that one brown mare, 3 years old, white strip in face, one hind foot white, branded CE on left shoulder, was impounded in the pound kept by the undersigned on the southeast quarter of 4-12-26, on the first day of June, A.D. 1920.

Given under my hand at Clareholm this first day of June A.D. 1920.

Ole Husted, Poundkeeper

### NOTICE OF IMPOUNDED ANIMAL

Impounded June 21, two black horses weight about 1000 lbs. in the pound kept by the undersigned on the north half of 14-13-25.

W. H. Brammer, Poundkeeper Carmangay, Alberta.

### LOST

Black colt, 2 years old, white face, two or three white feet, one hind leg white, nearly to hock, branded M as cut on right shoulder. Send information to John McInnes, Granum, Alberta.

### Obituary

Samuel A. Schram was born January 2, 1874, at Blue Earth, Minnesota, and died June 22, 1920, at Clareholm, Alberta. While still young he moved with his parents to Fraser, Minnesota, where he lived until April 1903, when he came to Clareholm, Alberta, where he has resided ever since except two years spent in Oregon. On November 29, 1900, he was married to Minnie Raymond, and to them were born one son and two daughters, who are left to mourn his loss. Besides these he leaves three brothers, I. G. of Lebanon, Oregon, E. L. of Clareholm and E. H. of Granum, and five sisters, Mrs. F. Palmer of Clareholm, Mrs. Chas. Rick of Lacombe, Mrs. W. F. Mard of Kinross, Mrs. Chas. Pearce of Fraser, Minnesota, and Mrs. C. Schram of Detroit, Michigan, besides a host of friends. Mr. Schram was one of the oldest settlers of this district and was highly respected by all.

### Card of Thanks

Mrs. Samuel Schram and family desire to thank their friends for their kindness and sympathy in recent bereavement; also to express appreciation of floral tributes.

### A Great Institution

During the last week of May some forty or fifty editors of Saskatchewan newspapers assembled at the University of Saskatchewan for their fifth annual convention and second annual short course for editors. For several days each year Saskatchewan editors thus live in a University atmosphere, not only holding their meetings within the college walls, but sleeping and eating in one of the student residence buildings and having placed at their disposal all the facilities of this institution of higher education.

What this means to the newspaper men it would be difficult to over-estimate, and that the editors appreciate the opportunities they are afforded was demonstrated by an attendance this year two and one-half times larger than a year ago. The assistance and encouragement thus given the press of Saskatchewan by the provincial university is bound to have a markedly beneficial effect on the years pass in the raising of the standard of journalism in the west.

Reciprocal benefits must likewise unquestionably accrue to the University by reason of the closer relationship and understanding of the press toward that institution. By being brought into close personal touch with the University and learning of and studying the many-sided activities of that institution, the editors are coming to more fully appreciate the really wonderful work it is carrying on and directing in the interests of the people, and they will not be backward in bringing to the attention of the people the advantages to be obtained through a loyal support of the University.

In the course of a brief address to the editors, preliminary to an inspection of the University, about the equipment, Dean Rutherford of the College of Agriculture, quoted some striking figures as indicating what the "education of farmers" costs means to the country in actual dollars and cents, apart from the decided advantages to the country which the educated man possesses over the uneducated. He stated that as the result of comprehensive surveys made in a number of States to the south it had been ascertained that, among farmers possessing equal means in the way of land, farm equipment and capital, the man with an education made a greater success than the man lacking such equipment.

Of farmers with equal opportunities in every respect, except in the matter of education, the following facts were established:

Those who attended the common school had a labor income for themselves of \$318.00 per annum.

Those who attended the high school had a labor income of \$620.00.

Those who had attended college had a labor income of \$851.00.

A somewhat similar survey of Dundas County, Ontario, had revealed the

fact that out of 100 farmers surveyed, 98 percent had no education except that obtained in the elementary school, notwithstanding the fact that there were four high schools in the county, thus demonstrating the regrettable fact that the boys who had attended high school had not gone back to the farms.

Why is it that the college educated boy makes such a greater success of farming than the one who lacks such training was revealed to the editors as they made their tour of inspection of the University. On one part of the University farm extensive experiments were being carried on to demonstrate the value of crop rotation, and the best crops to follow each other. Other experiments had on the object of ascertaining the best methods to prevent the blowing away of the soil, which is the cause of heavy losses annually when high prairie winds prevail. Elsewhere demonstrations were carried on to show the best type of horses, cattle, sheep and swine to breed in the district, and the nature of the crops which should be grown in connection with these types. In the well equipped farm mechanics building almost every type of tractor and other classes of farm machinery were in evidence where the students were trained in the handling and repair of machinery with a view to securing maximum results from their use. Lastly, through the object of the University Farming Train, which was standing on the university grounds preparatory to starting out on its tour of the province, there was revealed the practical common-sense manner in which the university is carrying to the people for and with the local community the result of the research work carried on at the university.

The University of Saskatchewan is unique among institutions of its kind that it embraces within the scope of its activities, not merely the arts and sciences, but everything that closely touches the lives and businesses of all classes of people, paying particular attention to the primary industry of the west, agriculture, whereas in most provinces and states agricultural instruction is quite separate and distinct from the universities.

The site of the University of Saskatchewan, consisting of 1,600 acres, is beautifully located on the banks of the Saskatchewan River, overlooking the city of Saskatoon. The magnificent buildings are built of native stone, obtainable only a few miles away, and year by year additional buildings are erected. Over \$2,000,000 has already been expended, and the ultimate plan call for the erection of a score or more handsome buildings and the expenditure of many more millions of dollars.

### Minard's Liniment Lubberman's Friend.

The Persian Gulf and its coasts are in summer about the hottest place on the earth's surface, a temperature of 120 degrees in the shade being not uncommon.

### CONSTIPATED CHILDREN

Children who suffer from constipation, indigestion or any of the ailments due to a clogged condition of the bowels will find prompt relief through the use of Baby's Own Tablets. The Tablets are a mild but thorough laxative which can always be depended upon to regulate the bowels and sweeten the stomach. They are absolutely safe and are sold under a guarantee to be entirely free from opiates or other injurious drugs. Concerning them, Mrs. Thomas A. Boutlet, Lake Baker, N.B., writes: "I am pleased to state that Baby's Own Tablets were great help to me when my baby was suffering from constipation. I got them from the Dr. Williams Medicine Co., Brockville, Ont."

At the end of 1917 Germany had more than 83,000 women metal workers.

### A perfect shave in 3 minutes

is AutoStrop Razor service. Stropping and cleaning without taking anything apart, without even removing the blade from the frame is an exclusive AutoStrop feature.

And the quality of the shave is the kind you are craving for.

Your dealer will demonstrate the AutoStrop Razor to you. He will guarantee to refund your money, if the razor does not prove to your entire satisfaction.

### AutoStrop Razor - sharpens itself

Only \$5.00 - complete with strop and twelve blades in attractive assortment of cases.

AutoStrop Safety Razor Co., Limited  
AutoStrop Building, Toronto, Canada

### Maximum Egg Production

Selecting Type of Hens For Their Laying Ability

Do you keep "just a few hens," and do they roam at large, laying eggs in nests of their own selection? Or do you "keep hens in a row" and are you realizing the maximum in egg production from them?

Once in a while we find a farm flock where there is no effort made to select hens for egg production. True, the owner believes in feeding the flock good and abundant feed, but puts no faith in the study of laying types and the keeping of trapnest records. Soon, very soon, only enough birds are kept to supply the household, and so long as the flock produces sufficient eggs for breakfast every morning, he is satisfied.

But he is a foolish man.

Look at the dairy industry - see how it is advancing because of the great improvement in breeding stock. If good cows will produce good offspring with the ability to produce large quantities of milk, doesn't it seem reasonable that high-producing hens should also produce a large percentage of their offspring with the laying ability stamped on them. Of course, not all of the progeny may be up to the standard of the mother, but we do know that they are apt to be quality stock than the offspring of a scrub with a poor record. Actually, it sometimes does seem like a joke to study laying types and try to estimate a hen's egg production. But it is not so funny to be using expensive poultry feed and not be receiving eggs to sell. And it certainly is a great satisfaction to keep hens that pay their board and leave a profit to the owner after the hatch bill is paid.

Fairlymen know what testing has done for them. They are finding what the test means in determining poultry profits.

### Empire Building By Air

In the course of the end of the British Empire have been reached by aircraft from England, the Atlantic has been spanned, and the journey of over five thousand miles from Cairo to the Cape has been accomplished. Twenty-five years ago and more it was the dream of Cecil Rhodes to build a railway from Cape Town to Cairo—but geography prevented it. The airplane has at last given reality to his dream. And dreams not only his. To reach Cairo by air, one passes over the Arabian Sea, and the airway to India, above Palestine, where Isaiah saw the vision of the six-winged Seraphim, and on through Assyria, where winged creatures adorn the palaces.

### Manitoba's Wheat Production

The total value of Manitoba's 1919-20 wheat crops is estimated at \$118,850,400. Last year the province had 2,913,000 acres sown to wheat and the latest returns given show an average yield of 17 bushels to the acre.

### Japanese Fishermen Gaining Big Hold

Getting a Corner on B. C. Salmon Fisheries, According to Statement

That the Japanese fishermen are gaining much too strong a hold on the salmon fishing industry in British Columbia was the statement made by Lieutenant-Gov. Peck, V.C., to the parliamentary committee on prisons and re-establishment. Last year there were 2,277 Japanese licensees as against 417 native-born Canadians. The Japanese "jigglers" their naturalization papers back and forth and so overcame the law which required naturalization before a license could be issued. Gov. Peck declared that \$50,000 more returned men had gone to British Columbia than the total number which were overcast from that province.

William Form, secretary of the civil service commission, said that of 6,000 civil servants, \$5,456 were returned men, but only 7,600 were permanent.

The commission had recommended after the armistice that no further appointments be made permanent until all Canada's soldiers were home. However, the government did not accept the recommendation.

### The Death Warrant Delivered

No defence can be offered when you apply Putnam's "Jigglers" to the offender has to die. Nothing is so quick to cure corns as Putnam's Corn and Wart Extract; try Putnam's, it's free from acids, and makes no blisters.

### Keep Tires Inflated

Soft Tires Are Comfortable But Also Expensive

Some motorists do not keep their tires properly inflated, giving as their reason that the car rides so much easier with a soft tire, and that when inflated to the pressure recommended by the maker, the car rides hard.

If one can afford such luxury, well and good, but it is expensive. It is a good thing to remember that a greater consumption of fuel, a breaking up of their fabric due to the wearing movement and other stresses that separate the plies of the fabric, and shorten the life of the casing. Worst of all, if the tire is run in economy to observe the instructions of their makers, and if the car rides hard, it tends to discover the real cause of the trouble and remedy it, instead of wearing out costly tires.

Every jolt which you spare yourself by under-inflation, will come back to you in another form when you find out how much you are out-of-pocket for tires.

### Catarrh Cannot be Cured

by LOCAL APPLICATIONS, as they can't reach the seat of the trouble. Catarrh of the bladder, urethra, prostate, etc., can only be cured by the use of the medicine known as "Catarrh Cure." It is a cure for all catarrhs of the system. HALL'S MEDICINE CO., 1111 Broadway, New York, N.Y.

### Good Prospects Good

Saskatchewan Department of Agriculture Issues Favorable Report

Drop reports prepared by the statistics branch of the Saskatchewan department of Agriculture make satisfactory reading, and conditions generally throughout the province indicate that the 1920 crop has got away to a good start, and given favorable weather, should result in a good yield. Now the crop is well up from zero to 10 percent. The greatest damage from this cause having occurred in the central and southwest districts. In practically all cases where wheat was blown out, it is being rescued to oats and flax.

Many large districts, however, report no damage, and the bountiful rains of May 25 and 26 are responsible for this situation. While grasshoppers are reported to be hatching out in the southeast and central districts, they have as yet done no damage. They are small at present and in some localities are reported thick.

Ask for Minard's and take no other.

### Advertising Bill for Recruits

The amount of money spent in newspaper advertising for recruits to the C.E.F. in all Canada was \$45,184, according to a return tabled in the commons at the request of Joseph Archambault (Chamblay-Verecher). Of this sum, \$24,739 went to English papers, and \$24,444 to French. In Quebec \$6,248 was paid to English papers and \$2,262 to French papers.

Would you be fit of that terrible pain - SCIATICA - that makes it impossible to move? Try Templeton's Rheumatic Capsules. They have found lasting relief.

### Templeton's Rheumatic Capsules

Many doctors prescribe Templeton's Rheumatic Capsules. Write Templeton, 142 King St. W., Toronto, for free sample. Sold by reliable druggists everywhere at \$1.00.

### ASTHMA

Templeton's R.A.S. Capsules are guaranteed to relieve Asthma. Write Templeton, 142 King St. W., Toronto, for free sample. Sold by reliable druggists at \$1.00 a box.

### New Settlers for Canada

First Contingent of the British-Canadian Farmers Land Syndicate

The tide of immigration that is now passing through Montreal to the Canadian West included the other day a study group of young English and Scottish farmers, forming the first contingent of the British-Canadian Farmers Land Syndicate, an overseas organization which has secured large tracts of land in what is called the Spirit River settlement colony in Alberta. In the West each settler is assigned 160 acres, or a quarter-section of land, with the option of obtaining another 160 acres when the first tract has been improved. The district they were going to is situated about 500 miles northwest of Edmonton.

### Nechako Valley, B.C.

The Rich Mixed Farming District in British Columbia

Prices \$16 to \$20 an acre  
Payments spread over ten years

# Agricultural Industry Must be Encouraged Says Dr. Robertson

Dr. J. W. Robertson, C.M.G., has recently returned to Ottawa from a tour of the Dominion, on which he was sent by the government in order to place before the people of the country the present economic conditions and the great need for care and economy.

Dr. Robertson, who speaks with authority, having but recently returned from overseas where he went to investigate after-war food problems, was recently interviewed in regard to his dominion-wide tour. He remarked that people were ignorant of explanations of present conditions; that they wanted an immediate remedy, but the consequences of four years of losses occasioned by the war and the destruction and waste could not be remedied in a twinkling. There was little use in looking for an immediate remedy for the present high cost of living owing to the fact that the world's production of foodstuffs was not nearly equal to the demand. There was great need for increased production before any decrease in prices could be looked for. Farmers would continue to receive high prices for their products for the next two years.

Dr. Robertson contended that better conditions could have been taken into consideration when the

broad question of food supplies was being considered, and the policies of Europe would have much to do for at least the next two years with what was likely to happen to Canada's wheat crop. The allied governments had guaranteed minimum prices, the conclusion being that they wished to encourage in every possible way the industry of agriculture.

Speaking of retrenchment, Dr. Robertson said he thought it would be a great mistake to economize in regard to education or agriculture; on both these questions the government must spend generously and cautiously, adding that "as to the industrial situation the nation there is only one safe course to follow, to work diligently with intelligence, to live economically and to waste nothing."

Regarding Canada's financial position, Dr. Robertson said that to enable the country to maintain its credit conditions of prosperity and to pay her debts, they must rely on the improvement of agriculture and the further development of her natural resources and industries. Further than that, in order to hold her place in the world's markets her people would have to be well informed, as well trained and as well organized as others.

## Europe and the Drink Question

Many European Countries are Edging Towards Prohibition

In an issue of the Morning Advertiser, of Calgary, Alberta, appears an interview with W. E. Johnston, M.P., of the well-known temperance advocate gives his views on the prohibition question in Europe. In the course of his remarks Mr. Johnston in part spoke as follows: "I have just received a cable from the Republic of Denmark, stating that the Danes are shortly to have a national election on prohibition and the measure will probably carry."

"Finland is the first European country to go dry by vote of its parliament. Norway has voted for the prohibition of all liquors containing over 12 per cent. spirits. In other words, it is on a light wine and beer basis. Sweden, except in the large cities, is also dry as regards spirits. Denmark has taken the lead in order to refuse licenses for drinking places. As a result over 200 parishes are already dry."

"The French National Assembly has just passed a bill to prohibit the sale of 60 members of parliament are dry as to spirits. In Italy the other day Premier Nitti astonished parliament by announcing his purpose to introduce a bill to limit licensed drinking places because too much wine was being consumed. In Czechoslovakia President Masaryk is a dry."

"There are as yet, no very potent dry movements in Spain, Portugal, Switzerland, Austria, Hungary, Greece, the Balkans or Poland. Russia is in a state of doubt. We do not know whether the Russians want the country dry or not. Scotland has a local option election this fall and we expect to carry many districts. In England there is no option election scheduled for 1919, but my information is that 23 out of the 26 members of parliament are in favor of prohibition."

"In England there is no machinery for voting on the question of prohibition, but there is a growing prohibition movement."

## The Original Clocks

Sand Glass Used in Rome Many Centuries Ago

Homesees in these days very commonly use the sand glass, or the familiar hour-glass pattern for timing boiled eggs. They are employed for sanding purposes in restaurants and hotel kitchens. The contrivance is, of course, quite ancient, dating back to the middle ages. In fact, the remaining two very long ago, it was utilized for timing prayers and sermons. Even nowadays there is an occasional old-fashioned church that keeps "prayer-glasses" on the pulpit.

As one might imagine, glass glasses were not beyond criticism in point of accuracy. Four centuries ago, fully tested recently by the writer. One, supposed to mark an hour, was found to require ten minutes to run. A serious error for the congregation if the sermon was dry. Another for three-quarters of an hour, registered only 42 minutes. The remaining two, respectively, undermarked and overmarked two minutes.

The sand glass, in European countries, replaced the yet more antiquated "time candle," which was marked off in sections of an hour. As a time-keeper, the candle is exceedingly ancient. It was so employed in Rome before Christ was born, and very likely by the Egyptians and Babylonians in much earlier days. Counting by candles, in fact, was an old-fashioned custom in England.

An equivalent method of time-keeping is even now practiced by the Chinese. In their temples, where a candle, a length of six sticks—the same thing that small boys use as "punk" for smoking—was placed in a wooden stand, it was to be steadily put down and crumpled with violence must observe punishment fitting the offence. The cat or the scold—both of them—were used to this purpose. The London Daily Express.

High Wheat Prices May Double Land Values

What higher prices will cause land values to double in western Canada, according to land men, and this will result in the best immigration the west has ever known. Settlers always come on a rising market, they say, "and news of increasing land values is worth only one effective kind of publicity." A spirit of optimism, based upon present price and future prospects, pervades the entire real estate business.

Saskatchewan's Building Program. It is estimated that there will be over 100 million dollars worth of new buildings erected in Saskatchewan this year and that Regina will account for five millions of this amount.

## Silos For Sunflowers

Sunflowers For Silage Prove to be Unequalled Success

A company has been formed, with headquarters at Prince Albert, Sask., for the construction of silos. For the name of the company—the Sunflower Silage Company—it can be inferred that farmers in the district are greatly interested in this crop and it is believed that there will be a great increase in the production in the near future. Saskatchewan of what is proving to be one of the most prolific fodder plants known.

The Prince Albert district is among the first to put into practical use the results which have been learned on the experimental farms of western Canada and the United States with reference to the growing of sunflowers for ensilage purposes. The use of ensilage in the corn belt is well known and has without doubt contributed largely to the great prosperity and the high prices of the crops which exist today. The Saskatchewan and Alberta have long felt the necessity for some cheap green winter fodder, and it has been with this object in view that the experimental farms in Montana, Saskatchewan, Edmonton and the Canadian Pacific railway lands department at Strathmore, Alberta, have been carrying on experiments and feeding tests with sunflower silage.

The growing of sunflowers for this purpose has been successful. The success, the yield of sunflowers greatly exceeding the tonnage of corn. In 1915, at Strathmore, Alberta, the sunflower crop made a growth of four feet and yielded 34.6 tons to the acre, in comparison with 14 tons of corn, and the silage was found to be grown under the same conditions. Reports from Montana give yields with an average rainfall from 20 to 30 tons per acre and the silage was found to be a ration showed a profit of about \$10 per acre more than those fed under similar conditions without sunflower silage.

In the Prince Albert district a number of prominent farmers have also received success for putting in a sunflower crop this year. Among them being J. M. Paul, of Macdonald; Mr. Swaby, of Coleman; Mr. Nugent, of Steep Creek; Mr. R. Cowell and the Boyd Ranch of Red Deer. For last winter at Scott, Saskatchewan, the silage was found to be a ration showed a profit of about \$10 per acre more than those fed under similar conditions without sunflower silage.

For last winter at Scott, Saskatchewan, the silage was found to be a ration showed a profit of about \$10 per acre more than those fed under similar conditions without sunflower silage.

In Darkest Egypt

Position of the Women in Egypt Is Now Serifdom

Mr. G. N. Barnes, M.P., addressing the Browning Settlement Brotherhood on his recent tour in Egypt and Palestine, said that the treatment of the women in Egypt was the worst phase of life in that country. The men of Egypt thought themselves the lords of creation.

"In many houses," Mr. Barnes continued, "I never saw a woman and you can take it from me that the position of the women in Egypt is absolutely one of serfdom, and dependence. They spend their lives in miserable hovels; in working in the adjoining fields; or in getting water. They are the serfs of the men, and as much beasts of burden as the donkey and the camel. A people which men women folk in that way is doomed to be a subject race, and does not deserve to govern."

The men who voiced the national sentiment of the Effendi, or the lower middle class, and the movement had not the remotest hold upon the general public. If Egypt was to be a nation, the position of the women must be extended to the whole of its people.

Referring to Palestine, Mr. Barnes said his impression after visiting the country was that it would be the benefit of everybody if the Jews were allowed to go back to that land. But it must be done without force, and without in any way injuring the susceptibilities of the Arabs.

Last Report on Great War. The part of the department of militia and defense in the work of the government in connection with the war, 1918, and October 31, 1919, is set forth in memorandum number 6 from that department, tabled in the House of Commons.

Death is the punishment for home-breaking in Siam.

## Work Done by Women on the Farm Has Not Been Appreciated

Some curious discoveries are being made as a result of the new place women are taking in the world of business and politics, one of the most amazing being the fact that the census enumerators of the United States designate farm women as having no occupation.

This matter is ably discussed in the North American, of Philadelphia, and which says, in part: "The farmer's wife is a human factor of the highest importance to the nation. In addition to the work she does, she bears more than half the children which keeps the world supplied with men and women. And she performs this service under conditions which many instances, should be changed by law if there is no other way to bring people to their senses. She works from daylight to dark without ever thought of pay. She cooks, scrubs, washes, irons, sweeps, sews, helps to plant and harvest, cans and preserves, cares for her own and her neighbors' sick and never has time for rest or recreation. She is the unpaid servant of the nation. Yet no one has thought of her in terms of cash."

She has no salary, no definite income, she works for nothing. Yet no one has thought of her in terms of cash. She has no salary, no definite income, she works for nothing. Yet no one has thought of her in terms of cash. She has no salary, no definite income, she works for nothing. Yet no one has thought of her in terms of cash.

She has no salary, no definite income, she works for nothing. Yet no one has thought of her in terms of cash. She has no salary, no definite income, she works for nothing. Yet no one has thought of her in terms of cash.

Imperial Exile Makes His Own Clothes and Makes Them Well

William Hohenzollern, former emperor of Germany, is trying his hand at tailoring, according to a German newspaper from Amsterdam. He is cutting out patterns for many new suits with which he is going to stock his wardrobe, and the dispatch quotes a trade paper as declaring he is "excelling in the job."

"How unfortunate it is," says this paper, "that William missed his vocation. After all the notoriety he has achieved as an emperor, one can imagine how he would have been his fame as a tailor."

Western Wool Crop

The wool crop of the western provinces is estimated to be as follows: (Manitoba, 300,000 lbs.; Saskatchewan, 800,000 lbs.; Alberta, 2,120,000 lbs.; and British Columbia, 300,000 lbs.)

## Change in Business Policy

We wish to notify the public that from now on our business will be conducted on a strictly cash basis. We believe in doing this we will be able to give everyone better prices.

Please do not ask for credit, as we do not intend to make any exceptions to the cash rule.

Come in and get our prices under this new system.

Yours for better business,

**Vanhorn & Stebbins, Ltd.**

## 6 per cent. Interest

To those desiring a safe investment at a high rate of interest, a new Bond issue, paying 6% interest.

These are ten-year Gold Bonds dated May 1st, 1920, and maturing May 1st, 1930, with interest coupons payable May 1st and November 1st.

Bonds are in denominations of \$100, \$500 and \$1,000.

The General Revenue and all the assets of the Province are behind this investment.

These Bonds may also be obtained from any recognized Bond House in the Province of Alberta.

Address all communications to DEPUTY PROVINCIAL TREASURER

HON. C. R. MITCHELL, Provincial Treasurer.

W. V. NEWSON, Deputy Provincial Treasurer, Parliament Buildings, Edmonton, Alberta.

## GOLD BONDS

### The Province of Alberta Offers

Investors may purchase these Bonds direct from the Department of the Provincial Treasurer, without commission of any kind or unnecessary delay in delivery.

This offering is intended chiefly for the benefit of the small investor, so that the industrious and thrifty, be he laborer, artisan, farmer, or professional man, may invest his savings by mail.

Remittances should be made by marked cheque, money order, or postal note.

## ALBERT E. STRANGE

Licensed Auctioneer

Work Guaranteed. Terms Right

## Farm Sales a Specialty

## Foreign Railways and Rates

During December, 1919, and January, 1920, the Italian railways advanced their first-class passenger fares 80 per cent. Their second-class fares 50 per cent. and their third-class fares 30 per cent. Both freight and passenger rates already during the war had been advanced 50 to 60 per cent.

The passenger rates of the French railways, two of which are owned by the government and all of which are being operated under government control, were advanced 40 per cent during the war and the freight rates 30 to 37 per cent. Because of the deficits which have continued to be incurred proposals for further advances have been under consideration.

The advances in rates on the Austrian railways since pre-war days have been enormous. The increase of 30 per cent made in February, 1920, made the total increases about 200 per cent.

In September, 1919, freight and passenger rates in Belgium had been increased to 150 per cent since pre-war times. Further increases have been made since then.

In September, 1919, freight and passenger rates in The Netherlands were advanced 50 per cent.

Very much the largest advances reported in any country have been made in Germany, where, it is well known, practically all railways are owned and operated by the government. Reported advances were made during the war and still further very great advances have been made since the signing of the armistice. The passenger rates now average about 100 per cent. Above this before the war, and the freight rates about 500 per cent higher.

Large advances in rates have also had to be made in many countries which were remote from the seat of hostilities. For example, in December, 1919, all freight and passenger rates on the South African Government railways were advanced 25 per cent, while in August, 1919, a raise of 20 per cent in both freight and passenger rates was made in Brazil, and in October of the same year additional increases were proposed. Even in Australia, which was about so remote from the theatre of hostilities as any part of the world, all the government railways have suffered severely from the rise of the cost of the war and have had to make advances in rates.

The railways of Great Britain were placed under government control at the beginning of the war and are still being thus operated. During the war the passenger rates were advanced 80 per cent, while the freight rates were not advanced at all, and because the increases in expenses greatly exceeded the increases in rates the government incurred a large deficit. To reduce or wipe out this deficit advances in the freight rates of the British railways ranging from 25 to 100 per cent were made effective on January 15, 1920, and extra charges were added to rates which cover the collection and delivery of freight at stations as well as its transportation. In March, 1920, the demurrage charges imposed for holding a car one day beyond the period of free time were increased 100 per cent, and the charges for subsequent days 200 per cent.
